Q3

DOMINANT

COST &
VALUE

**When the cuts come,
does my value story
protect me, or make
me the easiest line to
delete?**

**Ranked third by procurement leaders at our
ProcureCon 2026 roundtable**

WHAT IT REALLY MEANS

Inflation, tariffs and volatile input costs keep squeezing margins, and savings is the most fragile number you report. Headline figures often hide the rework, rush fees and quality trade-offs that quietly hand the saving back.

A function defined only by cost reduction becomes the first line finance cuts when budgets tighten.

WHAT THE ROOM SAID

Procurement leaders' own topics, in their words.

Increased savings targets in volatile markets, plus PPWR compliance costs.

Commercial

Standardise POSM across countries to drive efficiency and scale.

Standardisation

Reduce materials and re-engineer permanent POSM to cut logistics costs.

Sustainability

Energy costs across the venue estate: consumption, procurement and usage.

Cost control

Manage inflationary pressure while protecting the customer proposition.

Inflation

THE STRONGER POSITION

Show value in terms the business already rewards: speed to shelf, fewer write-offs, a consistent brand.
